KEY FEATURES FOR COUNTY PACKAGE

Interactive ESRI GIS mapping, which is fully integrated into all products.

Customizable Dashboards for Internal staff and External costumers.

Mobile Application that will run on both Apple and Android devices.

Staying up with Technology

Products are configured to meet the needs of each county.

Built on Business Rules and a low code platform.

The products are Cloud based but can be installed on premises.

Robust Workflow Engine

Delasoft has its own Security Package, or we can implement the County's security system.
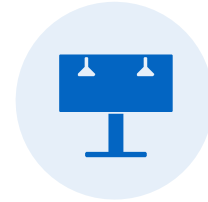

The public and businesses can have accounts in the system, which will allow them to submit Electronic forms and Permits.

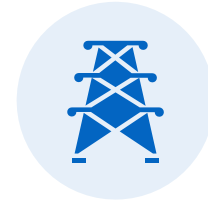

DELASOFT

ELECTRONIC PAYMENTS

If you have a vendor that takes Credit Cards or ACH payments:

- The vendor **should** open a portal and pass the person to the payment processor and hold **no financial** information.

- If the vendor holds the financial information for any **time period** (batching at the end of the day is cheaper than doing it live), then they **must be** PCI certified, licensed by the state and have extensive security certifications.

- If they don't and they have a security breach the people effected will be coming for the **group with the deepest pockets.**

DELASOFT

WHAT IS AWS GOVCLOUD (US)?

- A specialized AWS cloud environment designed for government agencies and regulated industries.

- Purpose-built isolated regions for managing sensitive data.

- Over a decade of service supporting critical high-value assets and regulated workloads.

AWS GovCloud (US)

DELASOFT
