

Below are the presenters/guests that were gracious enough to brave the weather and educate us on important issues within the zoning world. Under each presenter is the presentation(s) he or she gave, along with their affiliation and contact information. If you have any questions, please reach out and network with them, as they are extremely valuable and knowledgeable, and share the common interest in ultimately protecting our environmental resources, the interests and rights of landowners, and ourselves as employees.

***Eric Olson***
